AUTO COATS

BREATHING COMPRESSED AIR.

Submarine Tunnel.

below ground, but still on dry land and in

the ordinary atmosphere. It arched above

us exactly like the subway. All over the

bottom of it were rickety little car tracks,

excavated, and just beyond us the tunnel

was partitioned off-bricked up with a solid

wall-through which, however, ran a hol-

low cylinder about as big and as long as

the boiler of a locomotive, and through that

asked my guide.
"No."
"Heart ever been seriously affected?"

Ever been under compressed air before?"

I called to mind an ethereal lyric dedi

cated when I was even younger than I am now, but answered "No." With this assurance we entered the cylinder with a

few cars for company, the little steel door closed behind us with a hollow bang-which

made me feel like a rat in a trap-and then came a deafening roaring and hissing as

the valve from the under water part of the tunnel rushed through the pipes into our

small compartment to make our atmos-phere pressure equal to its own.

"Keep swallowing!" shouted my guide, with his mouth close to my ear. So I kept

swallowing. "Hold your nose and blow!" I held my nose and blew out my cheeks.

so as to force the air into those tiny canals

that lead from the throat to the inner

side of one's eardrums, and thus equalize the pressure on them. And along with the

roaring of the air came many strange new rearings and singings in my head as the

pressure went up and up and the air grew warmer and heavier, like the atmosphere in a hothouse, and more difficult to breathe.

Finally the roaring ceased, the door at the opposite end of our tube, which but a mo-

nent ago could not have been forced open

by any twenty men, now swung easily back, and we stepped out into an atmos-phere which, could it have burst through

the door upon us, instead of coming to us gradually through suitable small valves,

would have blown us bodily out of the tube and into the next world, like so many

HER WALK AND HANDSHAKE.

Woman's Changed Way of Greeting

and of Bodily Carriage.

Woman changes, not only form to suit

the season, but her manner as well. Art-

ists marvel at the sudden new curves and

hollows that she develops apparently at

will, and philosophers ask how such things

can be accomplished. This winter is wit-

nessing many decided changes in walk and

in the various fads of dress, but above all

in the manner of greeting between women

friends. Time was not long ago when

women kissed when they met. On all oc-

casions-at weddings, funerals and recep-

But it grew to be a back number, and

then women who had never shaken hands

in former days began to grasp each other's

hands in most cordial masculine fashion.

Then some one elevated the handshake, and it mounted higher and higher and

moved from right to left in pump-handle style. Then there was a time when wo-

men thrust their faces toward each other

as though they were trying to see the exact depth of the complexion and hair tinting the friend was using. This season

marks an entirely new departure. Those who like to be up to date in such things

are practicing the new handshake, as low as the waist line, with the arm and body

It is the very newest things in greetings.

horse show were these new fads of greet-

ing, and they occasioned considerable com-ment among people not within the circle

ment among people not within the circle of those who always do the right thing. The feminine walk of the season has changed about absolutely, from the athletic swinging gait of the summer, with its startling manner of elevating the skirts from the ground, to a most rigid poise of the body from the hips up to the head. There is a decided droop forward from the waist and the elbows are held

head. There is a decided droop forward from the waist, and the elbows are held

from the waist, and the cibows are held well out from the sides with military stiffness—the arms, describing two curves, joining in the muff, which is held very low in front, at the full curved length of the arms, instead of the angular elbow bend, as formerly. The muff, by the way, is held by the fingers, instead of incasing the

### The Mush Era.

The manufacture of oatmeal was introduced into this country about fifty years ago. Cracked wheat and similar preparations followed. The whole popu lation began eating mush. Result: Amylaceous dyspepsia, universal sour stomach, constipation, disordered livers, thin blood, weak muscles and nerves, brain fag and nervous exhaustion. The remedy lies in replacing these starchy foods with Toasted Wheat Flakes, sweetened with Malt Honey. Each appetizing flake is crisp delicate brown, thoroughly cooked and toasted. The starch ing it immediately digestible and a godsend to those who cannot digest starchy foods. Toasted Wheat Flakes are ready to serve at once withou further cooking and are delicately delicious. . Every package bears a picture of the Battle Creek Sani-

INVADING NEW YORK

SAKS & CO.'S NEW BROADWAY AND 34TH STREET STORE.

Handsome Mercantile Structure Cover an Entire Block and Cost \$750,000.

One of the most imposing commercial structures in New York's new shopping center on Herald square is now under construc tion for Saks & Company of this city. A picture is reproduced by the courtesy of Buchanan & Fox, the designing architects. The building will have a frontage of 211 feet on Broadway. It will be 150 feet deep on 33d street and 85 feet on 34th street. There w'll be seven stories and two base-

ments. In the sub-basement will be the mechanical plant, boilers, engines, dynamos, witchboards and elevator appliances, with an claborate and up-to-date heating and ventilating plant.

The basement proper will have an unusually lofty ceiling. It is to contain shipping coom, cloak rooms, resting rooms and lunch rooms for employes. A part of the basement will be devoted to the selling of merchandise and still another part will be turned into a restaurant, with a luxuriously ppointed separate entrance on 34th street Of the seven floors above ground, which on account of the great celling height of each floor will tower 130 feet above the street level, six will be devoted to retailing.

PALMA ELECTED IN CUBA. The Friends of Gen. Maso Declined to Go to the Polls.

A dispatch from Havana yesterday says: The indications are that the entire Palma ticket will be elected, and that Tomas Estrada Palma, the nationalist candidate for the presidency of Cuba, will receive the unanimous vote of the electoral col-

the democratic candidate, who recently retired from the campaign, not only withdrew their candidates, but refused to go to the polls.

A remarkably light vote was polled throughout the island. La Discussion describes this indifference to the certainty on the part of the Palmaists of being vic-

torious, and that consequently the majority of them remained at home and did not La Lucha says that this light vote can be taken as a protest from the Cuban people against the imposition of official candidates.

The Diario de la Marina says that the result is an indication that the Cuban democracy may look upon American policy as inevitable. A dispatch from Santiago de Cuba last night says: The municipal government of this city celebrated the victory of the nationalist party at the polls yesterday and the inauguration of the new year by rais-ing a silk Cuban flag, forty feet long, over the city's end of the palace at midnight last night. Colored fire, Roman candles

palace, made a fine display. A band played the national hymn, and the plaza in front of the palace was croweded, A brilliant ball was also given at the San Carlos Club. Here the festivities were suspended during the ceremony of raising the Cuban flag, and the guests of the club,

and rockets, set off from the roof of the

including many American officers, wit-nessed the spectacle. At the base ball game played this afternoon, before 5,000 spectators, the Cubans beat the Americans by 14 to 2 runs,

Secretary Root received a brief dispatch from Governor General Wood of Cuba yesterday, saying that the elections through out the island passed off quietly, and quot water filtration plant. The Ashburn ing the newspaper reports that Estrada Palma had been chosen president. The electors will meet on the 24th of February and cast their ballots for president

> Tomas Estrada Palma, the descendant of five years old, was educated in Havana and five years old, was educated in Havana and became a lawyer. He eagerly took part against Spain in 1898, was chosen to the corgress of the revolutionary government, and in 1875 was elected president of Cuba. Palma was captured by the Spanlards and was detained in a Spanish castle for seven years until the end of the conflict in 1879 Enduring intense hardships, Palma was of

Enduring intense hardships, Palma was ofered freedom if he would swear allegiance
to the Spanish crown.

"No," he answered, "you may shoot me
if you will, but I will die as president of
the Cuban republic."

Coming to this country, Palma opened a
school for boys at Central Valley, Orange
county, New York. During the war between
the United States and Spain he was the
head and front of the Cuban junta. He is
intellectual, courteous and has business acumen.

Proof Positive. From the Brooklyn Eagle. Willie Boerum (triumphantly)-"Pa; they

will be taken up with a magnificent row of show windows. It will be the largest con-tinuous array of show windows in New York city, measuring 300 feet.

The entrances will be emphasized by green marble columns bearing ornamental lamps, the entrance feature running two stories high. The building will be adorned with a copper cornice and balustrade, on top of which will be a number of ornamental globes of opalescent glass, three and one-half feet in diameter, which will be lighted at night.

and the top floor will contain the main of-

and the top hoor will contain the main offices, receiving rooms, examining rooms and offices of the business management.

The building will be of skeleton frame construction, absolutely fireproof throughout. The design of the exterior is French renaissance. The materials will be limestone with ornamental iron trimmings.

There will be two large entrances on Broadway. The rest of the first story front

The elevators, eleven in number, will be of the plunger hydraulic type, quite a feature of the place. The building will be trimmed in hard wood throughout and will have hard wood floors on all seven stories. The estimated cost of the building is \$750,000.

Saks & Company will not conduct a department store, but a specialty store, in-tending to devote the entire building to the display and sale of things to wear only. Everything a man, woman, boy or girl requires for personal wear on all occasions will be furnished, either from stocks on hand or made to order. It is expected that the store will be ready for business September 15, 1902.

The firm's business in this city will be

greatly benefited by the establishment of a retail store of such proportions in the com-mercial center of the country. Their buying facilities, already great with six stores, will be vastly increased. In that Washington will have reason to congratulate Saks & Company on their new venture.

ANTHROPOID APES.

Investigating Points in the Physiology of Their "Motor Area."

Dr. A. S. Grunbaum and Prof. Sherrington of Liverpool exhibited at the triennial congress of physiologists a number of brain and cord sections of anthropoid ages on which they had been investigating points in physiology of the "motor area," Both excitation by Faradic electricity and removal had been employed. In view of the near approach of these brains to the configuration of the human it became obvious that the determination of the topography of the excitable and other areas must be in them of considerable practical importance to the study of human cerebral disease. They had at the outset of their work been surprised to meet with the results at variance with the topography generally ac-

cepted as probably obtaining in man.
It had to be remembered, however, that the generally accepted topography was based chiefly on results obtained in the lower, not in the higher, apes, and that of the anthropoid apes only a single species, and that of the anthropoid apes only a single specimen only, had previously been laid under experimental contribution. Their own experiments, embracing observation upon a series of chim-panzees, as well as on the orang and the gorilla, were completely unanimous in de-nying any extension of the "motor region" to the surface behind the Rolandic fissure. Nor had they found the fissures in the motor region inexcitable, as had been asserted for the cortex of the orang, or that the motor region of the anthropoid required Facurrents much stronger than those required for the lower monkeys. A num-ber of details were shown and dealt with in the communication, account of which limits of space preclude our here doing justice to. A chimpanzee taken to the congress for actual demonstration of the ex-citation effects became ill on the journey and succumbed before the experiment could

be undertaken.

We may remark that the research showed more clearly than evidence hitherto accessible that in the motor region of these complexly folded higher brains the cortical fissures do not coincide with functional boundaries in the cortex, and that they do not, indeed, bear any accurately constant relation whatsoever to the functional topography. They are, with the exception of the Rolandic fissure itself, quite insecure landmarks to the details of the arrangement of the functional "centers."

CANADA'S GOLD YIELD, Remarkable Increase in Output of the Dominion.

From the Indianapolis News. Compared with the United States, the

Dominion of Canada is still in its infancy as a producer of the hidden wealth of nature's treasure stores. But it is a lusty infancy, and the facts relating to Canada's advance in this direction are of deep interest to Americans. The dominion statistician, George Johnston, has just completed an examination into the comparative development of the mineral output of both countries. Canada's yield last year was only one-seventeenth of that of the United States, but, based on population, it represented a value of \$12.06 per capita, compared with \$14.03 in the United States. .

Canada's increase per capita in the decennial period, 1891 to 1901, was a fraction short of double that of the United States. being \$8.14, against \$4.11 for the United States. Ten years ago Canada's mineral yield would have to be multiplied by eightyfour to bring it up to that of the United States, whereas last year the figure had been cut down to seventeen. At this rate, the dominion statistician remarks, it will not take Canada long to pass the United States.

A notable fact gathered from Mr. John-ston's compilation is that 47 per cent of the entire metal production of the United States last year came from the furnaces which melted the iron ores, while 4 per cent which melted the iron ores, while 4 per cent only was the figure in Canada. Gold represents the largest part of the increase in Canada. In 1891 the gold produced in the dominion was only \$1,150,000, whereas last year it was \$27,908,000.

The metallic products of Canada chiefly comprise gold, s'lver, lead, nickel, copper, zinc and pig iron; while in the United States, besides these, there are produced quicksilver, antimony, platinum and aluminum, which do not appear in the Canada returns. Antimony is found in one province of Canada, Nova Scotia, and was at one time produced to a small extent, but a one time produced to a small extent, but a lawsuit stopped operations. Aluminum, although not yet produced in Canada, exists in deposits to the extent of millions of tons. Since Canada began producing gold it has added \$136,500,000 worth to the world's store Willie Boerum (triumphantly)—"Pa, they can't call a turkey an 'unspeakable Turk,' can they?"

Can they?"

Mr. Boerum—"Stop talking honsense, William."

William.

### Weak Backs Entering the Lock of the East Boston We were in the tunnel, about fifty feet

Omega Oil If you happen to be one of those unfortunate people with a weak, lame, tired, aching back, it is time you were finding out about Omega Oil. Goahead and try it, anyhow. Once

week or two. While you are using the Oil, be careful not to strain the back. and if you can you should not do any hard work. The rubbingshould be kept up about ten minutes or more each time Omega Oil is applied. A bad back needs more rubbing and longer treatment

than a mild case, and you must bepatient. Weakback is sometimes very stubborn, but Omega Oil will be found to work wonders if constantly used. New cases are much easier to

CAUGHT OFF HER GUARD.

Clever Monk Penetrates the Masculine Frenchman Refused to Enlist and Was Disguise of a Princess.

An interesting story comes from the French Alps of Dauphiny relating the futile efforts of the Princess of Croy, who not commonplace. Gontaudier emigrated desired to enter the monastery of the Grande Chartreuse, a habitation from the Quakers. When his time came to serve which women visitors are rigidly excluded. In the French army, he returned to France The story runs that the princess dressed herself in boy's clothes and accompanied that his religious principles forbade him her husband to the institution. The gates carrying a rifle. He was court-martialed were opened to them, and the prince sent | and sentenced to two years' imprisonment. his card to the father superior, with a line to the effect that he was accompanied by a to the effect that he was accompanied by a friend. Just as they were about to make the round of the building the word was received that the father would like to see the prince and "his friend." Going upstairs and those slow people who have only just grown accustomed to the very high, rotary handshake will have to unlearn the old fashion and cultivate a modification of the old. Exhibited each day at the recent they were received by the smiling monk, who cordially invited them to join him in an appetizing luncheon. The princess en-deavored to make the best of the situation, but she was not put any the more at her ease by the fact that the monk kept gazing

> At last he exclaimed suddenly: "Catch it. young man!" at the same time throwing at her a large pear. The princess was startled, her a large pear. The princess was startled, and, thrown completely off her guard, made a motion to grab up her skirt, the absence of which she overlooked in her confusion. Then the father stopped smiling and said with great gravity: "I beg your pardon, madam, but ladies are not allowed in the monastery. I must ask you to wait outside until the prince has finished his inspection." And outside she had to go, the reverend father bowing her from the room with most elaborate politeness.

A Tasty Ornament.

"Why does Briggs wear that brass button saved his life when he was a boy." "Because he values it highly. He says it SUFFERED FOR RELIGION.

Imprisoned Twice. Parls Correspondence of the London News

The minister of war has just sent home a soldier name Gontaudier, whose story is to the United States as a lad and joined and before the military authorities stated Having served the sentence out, he was sent back to the regiment. There he stated

that his religious views had not altered, and he was again sentenced to two years. Probably this second penalty for one of-fense was illegal, but legality, as everybody knows, is held by courts-martial as a than otherwise. He had served the greater part of this second sentence when attention was called to his case by the Aurore. Gen eral Andre, minister of war, at once decided that he should be sent to serve his three years in the ambulance corps. It now turns out that Gontaudier being the only son of an aged mother, was liable to one year's service only, and ought to have been sent away long ago. The minister of war has just recognized this.

Royal Pets. From the London Chronicle

The love of the royal family for animal pets is very well known, and there are some which accompany the court wherever it goes, even for the briefest stay When the king and queen came up to London yesterday on their Christmas present-purchasing expedition, at least half a dozen dogs were in the train, and among them a very corpulent and disorderly poodle, which was, presumably, dissatisfied at having to travel in an omnibus instead of in one of the royal landaus. Four bird cages were also among the baggage, and a hamper, which might possibly contain a cat.
